

How To Add Any Available Khan Academy Course To Your Account

First - Go to www.khanacademy.org and sign into Khan Academy with your OCPS Google Login.

1. Click on your username in the top right corner and select "Learner Home"

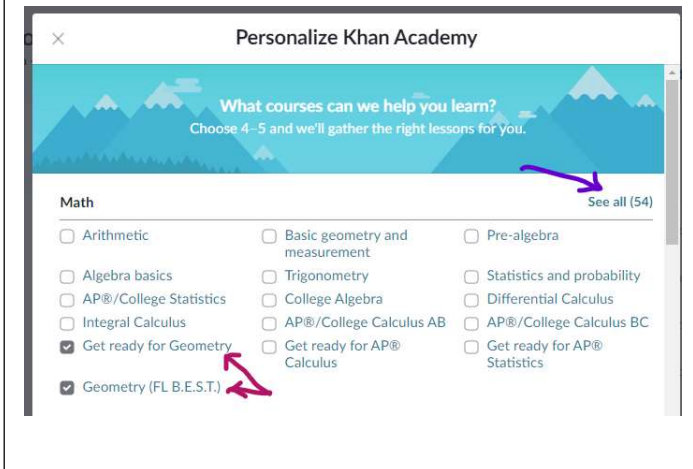

2. In the left side navigation list, click "Courses" under MY STUFF

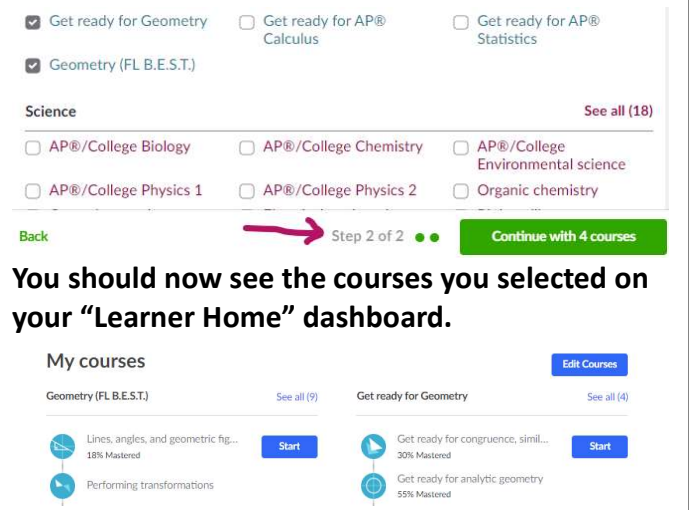

Then, where it says "My Courses", click on the button that says "Edit Courses"

Choose any course you wish to take:

Note: you won't see them all in the first set of choices. Select "See all" for that subject

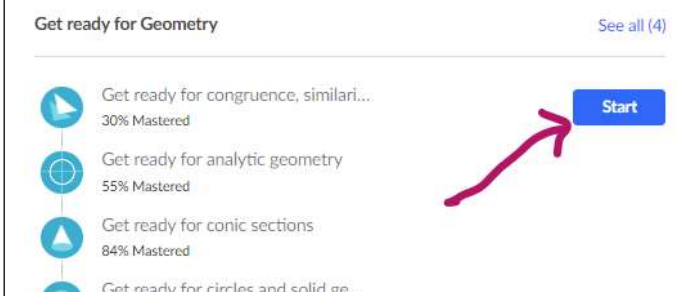

Once your courses have been chosen, click "Continue"

You should now see the courses you selected on your "Learner Home" dashboard.

Click "Start" to begin your chosen course!

When you start, you will be taken to the first (or next) unit in the course.

However, you can click on the course name (above the name of the unit) to get back to the main page of the course.

Then, you click **Get started** or **Continue** to begin at the suggested place for your personalized path.

Examples:
